---

## Research Interests

I specialize in using Human-Computer Interaction (HCI) methodologies to design and evaluate user-centered technologies. My research focuses on co-designing machine learning solutions for healthcare, emphasizing the end user's perspective.

---

## Education

Expected 2026 **Northwestern University**, Evanston, IL

Doctor of Philosophy (PhD), Computer Science, McCormick School of Engineering; GPA: 3.9/4.0

Advisor: Dr. Maia L. Jacobs

Research track: Human-Computer Interaction (HCI) / Interfaces

2023 **Northwestern University**, Evanston, IL

Master of Science (MS), Computer Science, McCormick School of Engineering; GPA: 3.9/4.0

2021 **Northeastern Illinois University**, Chicago, IL

Bachelor of Science (BS), Computer Science, College of Business and Technology; GPA: 3.8/4.0

2017 **Harold Washington College**, Chicago, IL

Associate in Arts (AA), General Studies; GPA: 3.8/4.0

---

## Honors and Awards

2023 - 2026 National Science Foundation (NSF) Graduate Research Fellowship (GRFP)

2022 Segal Design Research Cluster Fellowship

2022 Northwestern University (NU) Social Justice Mini Grant

2021 Northeastern Illinois University (NEIU) Computer Science Scholarship

2020 Abraham Lincoln Civic Engagement Award

2020 Ronald E. McNair Scholar

2018 – 2020 The National TheDream.US Scholarship

---

## Research Funding

**Understanding the connection between youths' mental wellbeing needs and educational challenges during the pandemic.** *Northwestern's Office of Diversity and Inclusion Social Justice Mini Grant*, 2021-2022 (\$2,500 USD).

---

---

## Related Work Experience

### 09/2021 - **Graduate Human-Computer Interaction (HCI) Researcher**

Present *Northwestern University (NU)*, Evanston, IL

- Developing expertise primarily in qualitative research methods and frameworks (e.g., interviews, usability studies, thematic analysis, affinity diagrams, storyboards)
- Collaborating with principal investigator/PhD advisor, other research assistants, clinicians, health behavior scientists, and machine learning scientists
- Defining research plans, collecting reliable data, as well as analyzing and distilling its insights with experts and lay audiences
- Identifying user needs, perspectives, goals, expectations, obstacles, and motivations
- Authoring research proposals, grant applications, manuscripts, and protocols with research team
- Actively improving research skills via symposiums, research talks, literature review training, writing workshops and courses
- Attend lab meetings with principal investigator, other graduate researchers and visitors and contribute to research discussions

### 05/2024 - **Graduate User Experience (UX) Researcher**

08/2024 *U.S. National Science Foundation (NSF) National Center for Atmospheric Research (NCAR) (NSF NCAR)*, Boulder, CO

- Conducting exploratory-primary research (such as interviews) and secondary research (such as literature reviews)
- Applying UX methodologies (i.e., Jobs-to-be-done, JTBD theory) to understand end user needs, preferences, and pain points with advanced data visualization software tools
- Effectively engaging with stakeholders, ensuring a deep understanding of their needs, concerns, and feedback in the context of UX research
- Performing user interviews, data transcription and analysis to deliver insights and recommendations to the team and organization
- Demonstrating strong verbal and written communication skills, including empathetic listening
- Applying analytical skills to interpret research data, identify trends, and draw actionable conclusions
- Actively contributing to weekly professional development workshops on topics such as science communication, leadership training, proposal writing, and data management and visualization
- Synthesizing research findings and delivering oral and poster presentations to the NSF NCAR community

2233 Tech Dr. (Office 3202) – Evanston, IL – 60208

[in mara-ulloa](#)

03/2021 - **Instructor and research collaborator**

Present *We All Code* (WAC), Chicago, IL

- Teaching six-hour workshops on programming fundamentals to youth (ages 7 - 18) in person or virtually
- Attending meetings with the organization's founder to develop student engagement strategies and improving learning experiences of the students
- Design recruitment materials, newsletters, write grants and communications
- Arrange classroom for effective learning, welcome students and their families, and manage team of mentors
- Maintain class equipment (e.g., robots and laptops)
- Distill leanings from team retro to improve future courses

08/2019 - **Computer Science Peer Leader**

05/2021 *Northeastern Illinois University* (NEIU), Chicago, IL

- Lead weekly virtual and in-person workshops on programming I and II concepts for first-year undergraduate students
- Collaborated with other peer leaders and faculty in optimizing programming workshops
- Guided students to campus resources and external opportunities
- Participated in combined virtual and in-person Peer Leader training
- Demonstrated strong communication, leadership, and organizational skills

05/2020 - **Software Engineer Intern**

08/2020 *U.S. National Science Foundation (NSF) National Center for Atmospheric Research (NCAR)* (NSF NCAR), Boulder, CO

- Developed a new touchscreen interface that displays real-time weather data to deliver a user- friendly and educational kiosk application to be installed at NCAR's Mesa Lab and NCAR Wyoming Supercomputing Center
- Lead virtual user interviews and communicate with stakeholders with the goal of gathering application requirements
- Took an active role in team meetings, engaging with all parties and transcribing detailed notes of plans, decisions and options discussed
- Participated in ten weekly science communication workshops while engaging in group and team building discussions
- Gave a poster and oral presentation to the NCAR and National Oceanic and Atmospheric Administration (NOAA) scientific community

08/2019 - **Computer Science Society President**

05/2021 *Northeastern Illinois University* (NEIU), Chicago, IL

- Attended meetings with faculty advisor and other officers on implementation of student-led biweekly workshops
- Led team responsible for maintaining the society's website
- Designed informative recruitment materials for workshops
- Coordinated workshops provided by a team of officers on tools such as GitHub and JavaScript fundamentals

---

## Research projects

2233 Tech Dr. (Office 3202) – Evanston, IL – 60208

✉ [mara.ulloa@u.northwestern.edu](mailto:mara.ulloa@u.northwestern.edu) • [maraulloa.com](https://maraulloa.com) • [mara\\_ulloa...](https://twitter.com/mara_ulloa)  
[in mara-ulloa](#)

01/2022 - **Co-designing patient-facing machine learning for prenatal stress reduction**

Present *Northwestern University (NU)*, Evanston, IL

- Examine ways pregnant people want to interact with next-day machine learning stress predictions, explanations, and recommendations
- Lead 20 co-design design sessions with a diverse population of patients
- Develop innovative co-design approaches to engage research participants virtually
- Design a storyboards of the patient-facing DST that visualizes distinct layers of machine learning, such as predictions, explanations, bias, uncertainty and risk
- Conduct usability testing to assess the functionality of the application
- Carry out independent literature review on user-centered design for health technology
- Analyze interview and survey data to distill findings via manuscripts and presentations

12/2022 - **Technology-enabled prevention service for at-risk youth**

Present *Northwestern University (NU)*, Chicago, IL

**Principal investigator:** Ashley Knapp, PhD

- Iteratively design and evaluate a technology-enabled prevention service for anxiety with youth and community partners
- Perform literature review on elements to incorporate in digital mental health tools in order to support wellness of adolescents
- Collaborate with research team across distinct domains on design of the mental health web application being developed

03/2022 - **Design of Digital Tools for Youth Mental Well-being**

Present *We All Code, YWCA (WAC)*, Chicago, IL

- Leading longitudinal participatory design studies with students from local non-profit organizations offering free programming resources to youth from diverse backgrounds
- Identifying the social support and mental health needs of students and how digital interventions can support those needs
- Designing Community-Based Participatory Research (CBPR) interventions with participation from students (ages 12 - 18)

01/2022 - **Iterative design of clinician-facing machine learning tools**

11/2022 *Northwestern University (NU)*, Evanston, IL

- Assessing user experience following a machine learning pilot in Northwestern Medicine's Electronic Health Record
- Leading qualitative semi-structured interviews with end-users (clinicians and members of the technical team) involved in the development of AI tool used to identify patients with advanced heart failure
- Independently coding themes from audio-recordings and discussing with research team
- The overarching goal of this work is to inform the integration of AI-powered tools into medical settings, with a focus on how to overcome sociotechnical challenges

2233 Tech Dr. (Office 3202) – Evanston, IL – 60208

05/2019 - **Improving the accuracy of cyberbullying algorithmic classifications**

11/2019 *Northeastern Illinois University (NEIU), Chicago, IL*

- Applied text classification algorithms that identified text as harmful or non-harmful with 87% accuracy
- Used Python scripts to retrieve and classify new socially relevant text images from existing datasets
- Engaged in weekly career development workshops
- Researched various subjects that were related to the project and presented information to mentors and team
- Presented findings at SACNAS National Conference and NEIU's Student Center for Science Engagement Symposium
